

Microlens arrays

- Telecom
- Imaging
- Displays
- Sensors

We offer high quality refractive microlens arrays in a wide range of focal lengths, aperture sizes, aperture shapes, lens spacings and arrangements.

A well controlled production process with dedicated equipment and special characterization tools combined with the long experience of our qualified personnel guarantees you state of the art microlens arrays.

- Lens array sizes up to 130 mm diameter
- Lens apertures from 10 μm to 1 mm
- Standard lens apertures are circular, elliptical, square and hexagonal. Other shapes are available on request.
- Focal ratios ($f/\#$) from $f/0.8$ to infinity
- Materials: fused silica, silicon or plastics.
